1. It was learned that the USSR has placed an order with the Debrecen railway car factory for flatcars to be used on broad-gauge tracks. These are to have a 120-ton capacity. The plans for these were furnished by the USSR, which also has assigned three engineers to the plant. The flatcars are of the six-axle type.
2. Four flatcars have already been delivered at Záhony, where they were adjusted for broad-gauge tracks.
